My Dinh, Ha Noi

SUMMARY

I'm a Front-end developer with over 4 years of experience. I'm also keen on learning Back-end development and emerging technologies to become an excellent programmer.

SKILLS

STRONG SKILLS

- Typescript/ Javascript
- NextJS/ ReactJS
- SCSS/ TailwindCSS
- Antd/ Shadcn ui
- Vite/ Webpack

OTHER SKILLS

- Basic English communication
- Strong problem-solving mindset
- Proactively researching and applying AI tools

EDUCATION

MAJOR: INFORMATION TECHNOLOGY **2018 - 2023**

POSTS AND TELECOMMUNICATIONS INSTITUTE OF TECHNOLOGY

Very good

WORK EXPERIENCE

FRONT-END DEVELOPER **July 2025 - April 2026**

ATI Company

- Assigned and distributed tasks to team members
- Broke down tasks and supported team execution
- Refactored codebase to improve performance and maintainability
- Set up and configured development environments

FRONT-END DEVELOPER **March 2022 - July 2025**

VMO Holdings

- Developed responsive and interactive web applications using ReactJS
- Collaborated with Business Analysts and Designers to define and propose solutions
- Built and maintained project base structures
- Ensured UI consistency and performance optimization

NOTABLE PROJECTS

PROJECT 1 **July 2025 - Now**

Front-End Developer

- **Description:** Developed an internal system for ROX Group to optimize procurement and bidding workflows. The platform streamlines management processes, accelerates distribution of bidding packages to contractors, and provides a dedicated portal for contractors to submit required information.
- **Team size:** 15
- **My responsibilities:**
  - Refactored source code to improve maintainability
  - Collaborated with BA and Designers to propose technical solutions
  - Assigned tasks and broke them down for team members
  - Set up development environments
- **Technologies used:**
  - ReactJS/ Typescript
  - bpmn-js
  - react-window
  - @tanstack/react-query

PROJECT 2 **March 2025 - July 2025**

Front-End Developer

- **Description**: The project-based initiative uses AISstream and GCP to allow sailors on ships and their family members to track the location and safety level in real time.
- **Team size**: 12
- **My responsibilities**:
  - Create source base
  - Read and confirm requirements with the BA team
  - Develop the UI according to the Figma design
  - Break down tasks and give the estimation

- **Technologies used:**
  - react-google-maps
  - react-hook-form/ zod
  - @tanstack/react-query
  - MobX

PROJECT 3 **March 2024 - September 2024**

Front-End Developer

- **Description:** Utilizes AWS Connect Streams to create an efficient Call Center solution for handling inbound and outbound calls. It manages Customer, Case, and Contact information, and supports the creation and distribution of global and manual notifications. The system also includes role-based permission management to ensure appropriate access and control for all users.
- **Team size:** 12
- **My responsibilities:**
  - Create source base
  - Read and confirm requirements with the BA team
  - Support team members to solve difficult tasks
  - Break down tasks and give the estimation
  - Develop the UI according to the Figma design
  - Training new FE developer
- **Technologies used:**
  - ReactJS/ Typescript
  - amazon-connect-streams
  - react-hook-form/ zod
  - Antd/ scss
  - Zustand

PROJECT 4 **October 2023 - March 2024**

Front-End Developer

- **Description:** Building an ESG (Environmental, Social, and Governance) data management system. It involves creating a structured database for ESG metrics, implementing data entry capabilities, and developing algorithms to calculate key indicators. The system will further enable the generation of visually intuitive charts and dashboards for stakeholders, offering real-time insights into the organization's ESG performance.
- **Team size:** 5
- **My responsibilities:**
  - Communicate with foreign customer to clarify the requirement
  - Estimate time to do tasks and issues
- **Technologies used:**
  - NextJS/ Typescript
  - Highcharts/ highcharts-react-official
  - Tailwind CSS
  - react-hook-form
  - Zustand

PROJECT 5 **October 2022 - April 2024**

Front-End Developer

- **Description:** The ICA application (ICA) is designed to automatically analyze documents and produce annotations that help auditors to assess the independence of an engagement.This automated analysis relies on a machine learning (ML) pipeline.The results are presented through a visual interface where auditors can navigate the documents, view the annotations, correct and comment them if necessary.

- **Team size:** 6
- **My responsibilities:**
    - Communicate with foreign customers, receive task and give the estimation
    - Implement UI code from template on Figma
- **Technologies used:**
    - ReactJS/ Typescript
    - Azure/ msal-react
    - react-pdf/ react-window
    - Antd/ less css
    - MobX
